Planned and organized CodeDay New York events for ~120 participants
Organizer
The Young Hackers *Feb 2015 - Apr 2016*
Advertised, planned and organized various hackathons in the NYC area for the local youth

//Projects

NyuTab *HTML, CSS, Javascript*
Web-page to replace a browser's New Tab/Home page. Displays time/age and dynamically changes the default/custom background scenery/image throughout the day. Had some daily users.
GitLove *HTML, CSS, Javascript*
A web app that connects GitHub users with other GitHub users of similar projects and programming preferences. I worked on the front-end design. *Winner at HackBU*
DeepSpace *HTML, CSS, Javascript*
A game that uses a custom API that takes Google Fit data to alter the game experience. I designed & created the website. *Runner-up at BrickHack 2*
InFuture Site *HTML, SASS, Javascript*
Worked with a team and designed a website for a high school hackathon. I did a majority of the design and artwork
Rutgers CS Website *HTML, CSS, Drupal, PHP*
Worked with the Rutgers CS Department to modernize their website with a new design and easy content management

//Skills

Developer Languanges and Frameworks:
Java, HTML, CSS, JS, jQuery, SASS, PHP, C
Software and Tools:
Git, Drupal, Eclipse, Inkscape, GIMP
